

## Kneehab NMES versions:

### **Documentation of the following language will need to be listed in the Medical Records**

- Presents with disuse atrophy of the quadriceps muscles
- Exam shows the nerve supply to the muscle is intact
- PT alone is not sufficient to treat disuse atrophy
- Treatment area is large and includes multiple sites – patient can't feasibly deliver treatment with standard electrodes, conductive garment required

### Paragraph Version –

Patient presents with disuse atrophy of the quadriceps muscles. Exam shows the nerve supply to the muscle is intact and PT alone is not sufficient to treat the disuse atrophy. The treatment area is large and includes multiple sites, therefore the patient can't feasibly deliver treatment with standard electrodes, conductive garment required.
